The fund is actively managed without reference to a benchmark.

Performance-related management fees

The management company will also receive an annual variable performance-related fee for the unit certificate classes tranche R, tranche RZ and tranche I. Subject to a “high water mark”, this variable performance-related fee will not exceed 15 % of the fund’s performance in excess of the ICE BofA German Treasury Bill Index (previously ICE BofA German Government Bill Index) plus 3 % (this is an absolute percentage figure and will be deducted from the figure for the fund’s outperformance of the index). The “high water mark” corresponds to the unit value as of the end of the accounting year for which a variable performance-related fee was most recently paid out. No variable performance-related fee will be paid in case of a performance which falls short of the “high water mark”.

This variable performance-related fee is recorded daily on the basis of the average fund volume and has an income effect in respect of the net asset value calculated each day. During the accounting year items will be credited to and debited from an amortization account in accordance with the fund’s performance; the total debit items may not exceed the total credit items in a given accounting year. The method developed by OeKB (Österreichische Kontrollbank AG) is used for the net asset value and performance calculation. This method assumes reinvestment of any payments or distributions. The fund makes an annual variable performance-related fee payment, upon expiry of the accounting year, as of the end of the following month, with an effect on liquidity.

Legal notice

The software used performs calculations on the basis of more than the two decimal places displayed. Minor discrepancies cannot be ruled out due to further calculations using published results.

The value of a unit is calculated by dividing the entire value of the investment fund inclusive of its income by the number of units. The total value of the investment fund is calculated on the basis of the current market prices of the securities, money market instruments and subscription rights in the fund plus the value of the fund’s financial investments, cash holdings, credit balances, receivables and other rights net of its payables. That value will be calculated by the custodian bank.

The net assets are calculated in accordance with the following principles:

- a) The value of assets quoted or traded on a stock exchange or other regulated market shall be determined, in principle, on the basis of the most recently available price.
- b) Where an asset is not quoted or traded on a stock market or another regulated market or where the price for an asset quoted or traded on a stock market or another regulated market does not appropriately reflect its actual market value, the prices provided by reliable data providers or, alternatively, market prices for equivalent securities or other recognized market valuation methods shall be used.

Raiffeisen KAG calculates performance based on the published fund price, using the OeKB methodology. Individual costs – such as transaction fees, the subscription fee (not exceeding 0.00 %), the redemption fee (not exceeding 0.00 %) or custody charges of the investor – and taxes are not included in the performance calculation. These would reduce the performance if they were included. Past value is not a reliable indicator of the fund’s future performance.

Dear unitholder,

Raiffeisen Kapitalanlage-Gesellschaft m.b.H. is pleased to present its semi-annual fund report for Raiffeisen-GlobalAllocation-StrategiesPlus for the reporting period from Apr 1, 2021 to Sep 30, 2021. The accounting is based on the price calculation as of Sep 30, 2021.

Fund investment policy report

During the past reporting period, the fund benefited significantly from its substantial weighting in commodities and inflation-protected bonds. The equities segment also made a crucial contribution to the fund's excellent performance.

In the period under review, the fund made the following key changes to its strategic orientation: In early summer, inflation-sensitive assets (inflation-protected bonds, commodities and inflation-sensitive equities), bond markets with lower credit ratings and Eurozone equities were scaled down. In return, a new position in French bonds was established. In mid-August 2021, we reduced the weighting of Australian government bonds.

Through its active strategies with shorter-term orientations, the fund's overall equity exposure fluctuated between approx. 18 % and 40 %. On average, the fund's equities exposure amounted to around 28 %.

Securities lending transactions were entered into in order to generate additional income.

- Identity of the counterparties for securities lending transactions:

Raiffeisen Bank International AG (as a recognized securities lending system within the meaning of § 84 InvFG)

- Nature and value of eligible collateral received by the investment fund versus the counterparty risk:

Under the master agreement on securities lending transactions concluded between the management company and Raiffeisen Bank International AG, Raiffeisen Bank International AG is obliged to provide collateral for loaned securities. Bonds, equities and units in investment funds are permitted as collateral. The bonds used as collateral may be issued by sovereigns, supranational issuers and/or companies etc. No stipulations apply in relation to the terms of these bonds. Within the scope of provision of collateral, pursuant to § 4 of the Austrian Securities Lending and Repurchase Agreement Ordinance (Verordnung zu Wertpapierleih- und Pensionsgeschäften, WPV), diversification and correlation with risk diversification achieved through quantitative issuer limits in particular and appropriate liquidity for collateral for the purpose of tradability and realizability will be ensured. This collateral will be valued on each banking day, subject to an add-on compared to the valuation of the securities loaned from the fund in accordance with provisions of EU Regulation 575/2013 (CRR). For bonds, this add-on will be determined on the basis of the credit rating of the issuer and the remaining term of the bond and will amount to no less than 0.5 %. For equities and units in investment funds, this add-on will amount to 10.607 %. The value of the required collateral, thus calculated, will result in the ongoing overcollateralization of the fund's outstanding securities lending positions.

On the reporting date the collateral had the following makeup:

ISIN	Security title	Regulated market	Currency	Asset class	Issuer	Rating	Volume Sep 30, 2021	Market value in portfolio currency
USY15025AB84	CHINA GOVT INTL BOND CHINA 0.55 10/21/25	LISTED	USD	Bonds	People's Republic of China	a	25,000,000	21,070,982.74

In relation to securities lending transactions, the investment fund is not entirely collateralized by means of securities which are either issued or guaranteed by an EEA member state.

Collateral holding period: unlimited

Period of securities lending:

Duration / Days	< 1 day	1-7 days	7-30 days	30-90 days	90-360 days
	0 %	0 %	0 %	0 %	100 %

Country of counterparty (Raiffeisen Bank International AG): Austria

Settlement: bilateral

- Reuse of collateral:

Collateral received is not reused.

- Custody of collateral which the investment fund has received in connection with securities lending transactions:

The collateral will be held in a separate sub-account with the custodian bank/depositary for each fund.

- Custody of collateral which the investment fund has provided in connection with securities lending transactions:

Within the limits stipulated by law (§ 84 InvFG), the management company is merely permitted to lend securities to third parties. However, it is not permitted to borrow securities. Accordingly, the investment fund will not provide any collateral within the scope of securities lending transactions.

Further information on repurchase agreements

During the reporting period, no repurchase agreements were concluded on behalf of the fund. Accordingly, the information concerning repurchase agreements which is stipulated in § 8 of the Austrian Securities Lending and Repurchase Agreement Ordinance and Art. 13 of Regulation (EU) No. 2015/2365 is not required.

Further information on collateral for OTC derivatives

In accordance with the requirements stipulated in the Regulation (EU) No. 648/2012 of the European Parliament and of the Council on OTC derivatives, central counterparties and trade repositories ("EMIR"), OTC derivatives are collateralized except for a minimum transfer amount, thus reducing the risk of default for the OTC derivative counterparty. Only sight deposits paid into an account kept by a credit institution which is independent of the counterparty were used as collateral during the reporting period. Haircuts are not taken into consideration here. Sight deposits received as collateral are not used to purchase further assets for the fund assets or otherwise reused.

On September 30, 2021, only OTC derivatives (forward exchange transactions) were open. Raiffeisen Bank International AG was the counterparty. As per this date, the management company had deposited 160,000.00 EUR of the fund assets with Raiffeisen Bank International AG to collateralize the open positions.

Total return swaps and similar derivative instruments

A total return swap is a credit derivative instrument. Income and fluctuations in the value of the underlying financial instrument (underlying instrument or reference asset) are exchanged for fixed interest payments.

The fund did not enter into total return swaps or similar derivative instruments in the period under review.
