Investment objective

The fund aims to provide capital growth and income of ICE BofA 3 Month US Treasury Bill Index + 4% per annum before fees have been deducted * over rolling three year periods by investing in a diversified range of assets and markets worldwide.

The fund may invest up to 20% of its assets in asset-backed securities and mortgage-backed securities.

The fund may also hold substantial levels of cash (exceptionally this may represent 100% of the fund's assets). The fund may invest up to 10% of its assets in open-ended investment funds (including other Schroder funds).

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 3 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Be aware of currency risk. In some circumstances you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

The fund's assets are held in safekeeping by its depository, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A. In addition, the fund's assets are segregated from the depository's assets, which limits the risk of the fund suffering loss in case of default or insolvency of the depository or someone acting on its behalf. However in the event of any loss, there is no compensation or guarantee scheme in place which may offset such loss.
